**To Whom It May Concern:**

It is my pleasure to recommend Mr. Tony Alfarela and Miclex Construction Ltd. to any company interested in a Construction Manager of the highest caliber. I have worked with Tony for seven years on many projects from the time when he was a Superintendent, then Project Manager with Bird Management until most recently when he was the Managing Partner of Man-Shield (Alta) Construction Inc. for Alberta and BC. Tony has been responsible for the successful completion of several of our very high profile retail and wholesale construction projects as well as numerous typical new store as well as expansion/renovation projects over the years. Tony has worked diligently and professionally to enable very successful project completions, both by achieving our aggressive opening dates as well as keeping the project costs within budget. Tony was also very proficient in dealing with our own numerous contractors and operations people who flood the jobsite to complete the fixture installations and stocking, well before project completion.

As we develop many Supermarket projects each year, we have the opportunity to work with numerous contractors and a wide variety of construction managers and the success of the project always comes down to the quality of the individual. With this in mind, Tony ranks as one of those individuals that I would appreciate running our projects and can trust him to achieve a successful project completion.

Yours truly,

Phil D. Rempel  
Senior Director, Projects  
Engineering and Construction.
